

# Signed agreement defining scrape targets, required CSV schema

---

## PARTIES

This Data Scraping Services Agreement (the "Agreement") is entered into on 2026-02-02 between:

- Buyer/Client: Riya Nand ("Client")
- Seller/Provider: Caleb Hart ("Provider")

Both parties transact on LOBSTR and agree that LOB token payments are final except as provided in the Dispute & Remedies clause.

## SCOPE OF WORK

Provider will collect publicly accessible product listing data for the period 2026-02-01 through 2026-02-14 from the following sources:

- A) competitor-a.example ("Site A")
- B) competitor-b.example ("Site B")

Deliverables:

1) One (1) consolidated, deduplicated dataset in CSV format containing only listings observed during the stated period.

2) A short methodology note (max 1 page) describing collection approach, deduping logic, and limitations.

Required fields/columns (exact headers): source\_site, listing\_id, title, price, currency, category, product\_url, image\_url, scraped\_at (ISO 8601), in\_stock (true/false).

Provider will not scrape behind logins, paywalls, or CAPTCHAs; if blocked, Provider must notify Client within 24 hours.

## COMPENSATION

Total fee: 1,200 LOB.

Payment schedule:

- 400 LOB due at signing (milestone M1).
- 400 LOB due upon delivery of a preliminary sample of at least 200 total rows across both sites (milestone M2).
- 400 LOB due upon Final Delivery and Acceptance (milestone M3).

If Final Delivery fails Acceptance Criteria, Client may withhold M3 until cure or pursue remedies under Dispute & Remedies.

## TIMELINE

- 2026-02-02: Agreement effective; M1 due.
- 2026-02-05: Provider delivers preliminary sample for M2.
- 2026-02-14 23:59 UTC: End of collection window.
- 2026-02-16 18:00 UTC: Final Delivery due (dataset + methodology note).
- Client review period: 48 hours after Final Delivery; Provider has 72 hours to cure any Acceptance failures after notice.

## ACCEPTANCE CRITERIA / DELIVERY REQUIREMENTS

Final Delivery is accepted only if ALL conditions are met:

- 1) Format: A single CSV file (comma-separated), UTF-8, with the exact required headers, and no nested structures.
- 2) Coverage: Dataset must include data from both Site A and Site B. Each source must contribute at least 500 unique listings (post-deduplication), unless Provider provided written notice of blocking within 24 hours of occurrence.
- 3) Freshness: All rows must have scraped\_at timestamps within 2026-02-01 to 2026-02-14 inclusive.
- 4) Dedupe: No more than 2% duplicate product\_url across the entire file.
- 5) Methodology note delivered as PDF or plain text.

Failure of any item is a non-acceptance event.

## **QUALITY, SCOPE CHANGES, & DISPUTE / REMEDIES**

Quality Standard: Provider must use commercially reasonable efforts to meet the Scope and Acceptance Criteria.

Scope Changes: Any request to add new fields, additional sources, or change formats must be agreed in writing via LOBSTR chat and may require a change order; absent a signed change order, Provider must still deliver the originally agreed format and fields.

Late/Nonconforming Delivery: If Provider misses the Final Delivery due time by more than 24 hours OR delivers nonconforming work and fails to cure within the cure period, Client may terminate and seek a refund of M3 (if paid) and/or withhold M3 if unpaid.

Subcontracting: Provider may not subcontract without Client's written consent.

Governing Evidence: LOBSTR escrow ledger and message timestamps control for payment and delivery timing.
